

Dura-Light Hub® Rotor Assemblies

The Perfect Balance of Weight, Strength, and Durability

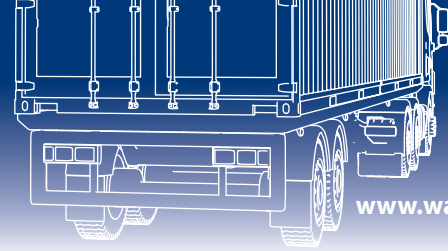

Walther EMC has leveraged a decade of air disc brake experience to create a stronger, longer-lasting rotor specifically designed for Dura-Light Hubs®

The #1 Lightweight Hub Rotor for Trailer ADB

**Save up to
50 lbs per axle
compared to ductile
iron hubs!**

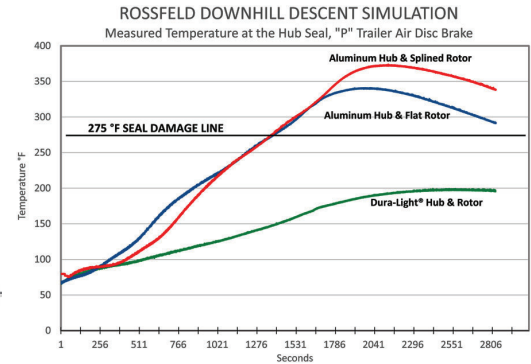

- **Best-in-Class Heat Management**
Protects Wheel Seal, Bearings, and Lubricant
- **Best-in-Class Lubricant Capacity**
Prolongs Wheel-End Life
- **Dura-Lock ABS™ Tone Ring**
Reduces Corrosion-Induced Signal Faults
- **Ease of Maintenance**
Saves Time and \$\$\$

Dura-Light Hub® Rotor Assemblies

Heat Management

- Dura-Light Hubs insulate wheel end components, keeping them cool and protected, whereas Aluminum Hubs act like a heat sink, drawing heat into the wheel end.

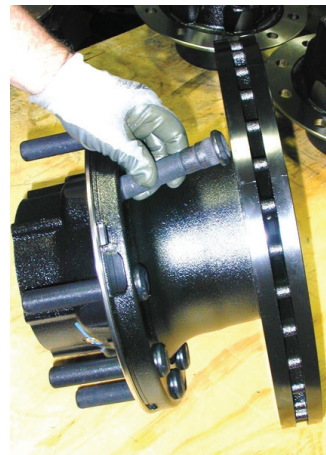

Dura-Lock ABS™ Tone Ring

- Rigid, Zinc-Plated Steel Tone Ring reduces corrosion and warping
- Heat-Resistant, Stainless Steel Lock Ring improves retention
- 8-post base design reduces rust-jacking

Ease of Maintenance

- Wheel Bolts can be serviced on the vehicle
- Wheel Bolts Attach Rotor to the Hub
- No Aluminum Hub maintenance risks
- Fewer Bolts to torque

Walther EMC U-Shaped x10

Competitive Splined x20

Competitive Flat Bolted x30
