Easy-Roll™ Hub Assemblies

The design of the Easy-Roll™ Hub has been optimized using sophisticated design technologies and finite element analysis (FEA).

The Walther name has a long history in wheel-end products. Over 100 years ago, George Walther revolutionized the industry by developing the first steel wheels for trucks. Steel was a dramatic improvement over the existing iron and wood wheels. Since that time, the Walther family has been a leader in the heavy duty wheel-end industry. Today, Walther EMC is the largest manufacturer of light-weight trailer hubs in North America with over 1,000,000 Dura-Light Hubs® serving the heavy trailer industry.

Walther EMC Part Number*	Description	Included Brake Drum
10-00106-102	Easy-Roll™ Hub Assembly, stand-out for hub piloted steel wheels, ABS	None
1001106-132043	Easy-Roll™ Hub and Drum Assembly, stand-out for hub piloted steel wheels, ABS	03-00043 (16.5x7)

* Typical configurations depicted, a variety of bolt, nut, ABS, and drum options are available.

Walther EMC Easy-Roll™ Hub and Drum Features & Benefits:

- Fits the industry-standard tapered “N” trailer spindle.
- Easy-Roll™ Hubs are machined in one operation virtually guaranteeing perfect alignment of bearing bores, seal bore, and brake drum and wheel mounting surfaces. This contributes to:
 - Extended tire life
 - Improved seal life
 - Extended brake drum life
 - Improved bearing life
- Easy-Roll™ Hub and Drum assemblies are the lightest standard ductile iron hubs/brake drums in the market.
 - Lower rotational inertia reduces fuel consumption
 - More carrying capacity
 - Saves up to 26 pounds per axle
- Easy-Roll™ Hubs have the largest oil capacity for standard ductile iron or aluminum hubs.
 - Industry-leading lubricant capacity (20.88 fl-oz versus 15 fl-oz)
 - More lubricant extends bearing and seal life
- Walther EMC prides itself on being a “Made in the USA” manufacturer! The Easy-Roll™ Hubs and Drums are cast, machined, and assembled in the USA.
- The interior and exterior of all Walther EMC hubs are E-coated for 1,000 hours of salt spray protection (compare to 50 hours in competitive offerings). This process yields the cleanest oil cavities in the industry.
- All Walther EMC hubs are warranted for the Life-of-the-Vehicle
- Walther EMC hubs and drums are certified through third party testing to be Federal Motor Vehicle Safety Standard 121 (FMVSS-121) compliant.
- Walther EMC hubs and drums meet or exceed OEM and SAE standards.
- Walther EMC is a TS-16949 registered company
